- Development & Sourcing

Let's talk about your needs!

We will be pleased to answer questions you may have and work out a customized approach for you. Please send your email direct to Johannes at jsonnenberg@vivax.de or call us in Germany and Hong Kong.

What Are Your Requirements?

Being close to your supply sources and customers doesn't come easy considering the distances to be covered in today's global business. But competitive pricing, top service, and quality products are important to ensure customer satisfaction, market penetration, and, as a result, customer loyalty.

We realize that and we are at your disposal! We will...

- ...visit your existing suppliers (and customers)
- ...acquire new potential supply sources
- ...check quality, mediate, and settle claims
- ...provide trade show assistance and service
- ...plan and arrange visits by you or your customers

Why Are We Qualified To Do That?

Because **VIVAX** is focussed on these topics and we have been dealing with and serving clients in North America, Europe, Hong Kong and China since 1986.

We are a small but professionally run entity and therefore are able to minimize the cost at our end. You are receiving the best possible benefit of Western design and market knowledge, being able to produce in Asia and the added security of quality checked products.

We have our colleagues on location and available to work with you. They are familiar with the fine tuning of Western and Asian mentality; ...and know the jewelry/watch/suppliers market.

This means that subcontracting all or part of your procurement, sourcing, or other projects to us will buy you the above advantages at little cost but at big gains regarding price worthiness, quality, dependability, and security.
